Direct Hay Weighted Average Report for week ending 5/13/2022

Volume			
	This Week	Last Reported (5/2/2022)	Last Year
Tons:			
Hay	1175	1925	2350
Straw	0	0	100
Total	1175	1925	2450
Bales:			
Straw	100	100	70
Total	100	100	70

Please Note: The above volumes (tonnage, acres, and bales) listed on this USDA LPGMN report are for confirmed trades only, it does not include estimated volume (tonnage) for bids or offers to the trade.

Compared to last week: Alfalfa and grass hay rather steady. Very good demand remains for high testing, dairy quality hay. Turnout time is here for beef cattle producers as the recent rains and warm weather has the grass green and growing. There were severe storms that came to the area this week, dumping rain along with damaging wind. Southeast SD has quite a bit of corn acres planted already, northeast SD has had substantially more rain which has kept row crop operators out of the field. Moderate drought conditions prevail west of the Missouri River, as well as severe to extreme drought in a pocket west of Pierre.

N/A						
Hay (Conventional)						
Alfalfa - Premium/Supreme (Trade/Per Ton)						
	<u>Qty</u>	<u>Price Range</u>	<u>Wtd Avg</u>	<u>Freight/Use</u>	<u>Description</u>	<u>Crop Age</u>
